1. Administration

Ms. Lisa Morelli called the meeting to order and welcomed stakeholders. Ms. Morelli reviewed the agenda and called attention to the Anti-trust and Code of Conduct statements. Ms. Cheryl Mae Velasco performed roll call and reviewed the draft meeting minutes from the 2/26 ERPIV meeting. The draft minutes were approved. Ms. Velasco reviewed the open action items and made mention that all items were to be addressed at the meeting.

2. Review Workplan

Ms. Morelli reviewed the draft workplan. No additional requests for changes were made.

3. Education

Mr. Joe Ciabattoni presented education on the conditions surrounding min gen events and negative LMPs. The presentation focused on the behavior of interchange and how limiting ramp would aid in these situations. This education was a request from Stakeholders and taken as an action item.

4. Interchange Volatility Matrix Development

Ms. Lisa Morelli reviewed the existing solution components that were discussed in the previous meeting. Monitoring Analytics sent additional components and options ahead of the meeting and they were incorporated into the matrix. Mr. John Dadourian reviewed the components and options and explained the reasoning behind the additions. Much of the meeting was focused on the discussion surrounding ramp limit adjustments being made for price volatility versus reliability. Stakeholders expressed concern that operators should not be making decisions to influence certain market outcomes. An action item was taken for PJM to internally discuss the method for calculating ramp limit adjustment.

PJM presented draft language changes to the Regional Practices regarding the guidelines in which ramp limit adjustments would be made. Presenting the proposed language change at this time was intended to give Stakeholders an idea of the direction that PJM was headed. The draft language was not presented as a means to show which solution package the group would move forward with and take to the MIC. An action item was taken to consider including a sunset time or remove the language around pricing in the 2nd paragraph of the proposed language.

Solution packages were discussed but not finalized. Stakeholders were encouraged to provide feedback at the next meeting.

Solution components and options for the Long Term matrix were reviewed, however discussions were limited.

5. Energy/Reserve Pricing Matrix Development

Due to the focus on discussions surrounding the interchange volatility piece and because of the time constraint, discussions for the energy and reserve pricing piece of the matrix were postponed until the next meeting.

6. Future Agenda Items

- a. Review and revise the workplan as needed
- b. Review Interest identification, Solution Components, and Solution Options
- c. Narrow down Solution Options
- d. Develop Solution Packages

7. Future Meeting Dates
