Appendix

- **Critical Issue Fast Path (CIFP)**
 - Alternative stakeholder process to be used for contentious issues that would be difficult to resolve with the normal CBIR process
 - Documented in Manual 34 Section 8.6.4
 - Initiated by the Board
 - Members may also vote to request that the Board initiate the CIFP process for new or in-progress issues
 - In this case, the Board issued a letter on April 6, 2021 directing the use of the CIFP for the MOPR issue
 - First time the process was used

Process – M34, section 8.6.4

Stage 1 – Similar to the normal CBIR process. PJM will provide stakeholder education and its initial solution package and alternatives considered, including its option alternatives to stakeholders

Stage 2 – Stakeholders may discuss any previously considered and/or new alternatives, with row-by-row reviews of the CIFP matrix.

Stage 3 – Based on the row-by-row discussions, PJM will finalize its package, and stakeholders will create alternative packages as appropriate.

Stage 4 – “Final Meeting”: For the benefit of all meeting attendees, PJM will review its package proposal in the solution Matrix on a row-by-row basis to show how its solution addresses the PS/IC. At the conclusion of the PJM presentation, Members and invited non-Member stakeholders, whether individually or in self-selected coalitions, will provide feedback to the Board on the impacts, positive or negative on the option details contained within the solution Matrix.
