Energy Price Formation Senior Task Force

Changes in fuel and technology combined with a slow-down in demand growth are influencing the markets and have revealed an opportunity to enhance energy market pricing so that prices accurately reflect the true incremental cost of serving load and minimize the need to recover those costs through out-of-market uplift payments. The Energy Price Formation Senior Task Force will evaluate proposals to enhance incentives for following load and increase flexibility to meet future electricity needs as directed by the [Markets and Reliability Committee](#).
