

# Manual 28 Revisions

## Section 6.3 Synchronized Reserve Charges

- Effective 1/1/2014 per Docket #ER13-297
  - Change to penalty obligation if a resource fails to provide the amount of Tier 2 it was assigned or self-scheduled to provide when a synchronized event occurs
  - Penalty charge for shortfall at SRMCP for all hours the resource was assigned over the immediate past interval (interval duration is lesser of annually determined average number of days between events or the number of days since the resource was penalized)
  - Penalty charges allocated as credits to those entities responsible for paying for Tier 2 (based on ratio share of synchronized reserve obligation MW less any Tier 1 synchronized reserve applied to obligation)

## Section 5.2.6 Operating Reserve LOC Credits

- Effective 11/19/2013 per Docket #ER13-2413
  - Added requirement that wind resources must have SCADA capability to transmit and receive instructions from PJM to be eligible to receive LOC Credits
  - Added reference to PJM Manual 14D: Generator Operational Requirements
