

Markets Gateway Enhancements

Page	Summary	Description
Generator Unit Detail	Internal Error - Turn Down Ratio Error Handling	In the calculation of turn-down ratio, there is a possibility that one of the values may be 0. There is no meaningful error message returned to the participant. Add a check for 0, and improve the error message
Demand Response	Missing Copy/Paste Functionality In Demand Response Hourly Updates	There is currently no capability to right-click and perform copy/paste in the DemandResponse Hourly Updates screen and this is inconsistent with all of the other similar Gateway screens.
Opportunity Cost Calculator	Misc. Opportunity Cost Calculator UI enhancements	Multiple small changes to the screen such as decimals being included and the save button being enabled sooner.
API	API download unlimited nodes	In eMKT API users were able to download unlimited nodes. In Markets Gateway view is limited to 500 nodes, would like to have unlimited download amount
