

eRPM/Capacity Exchange Roadmap

As of March 15, 2017

The [eRPM](#) refresh is underway. The refreshed application will be called Capacity Exchange.

Customer Impact/Expectations

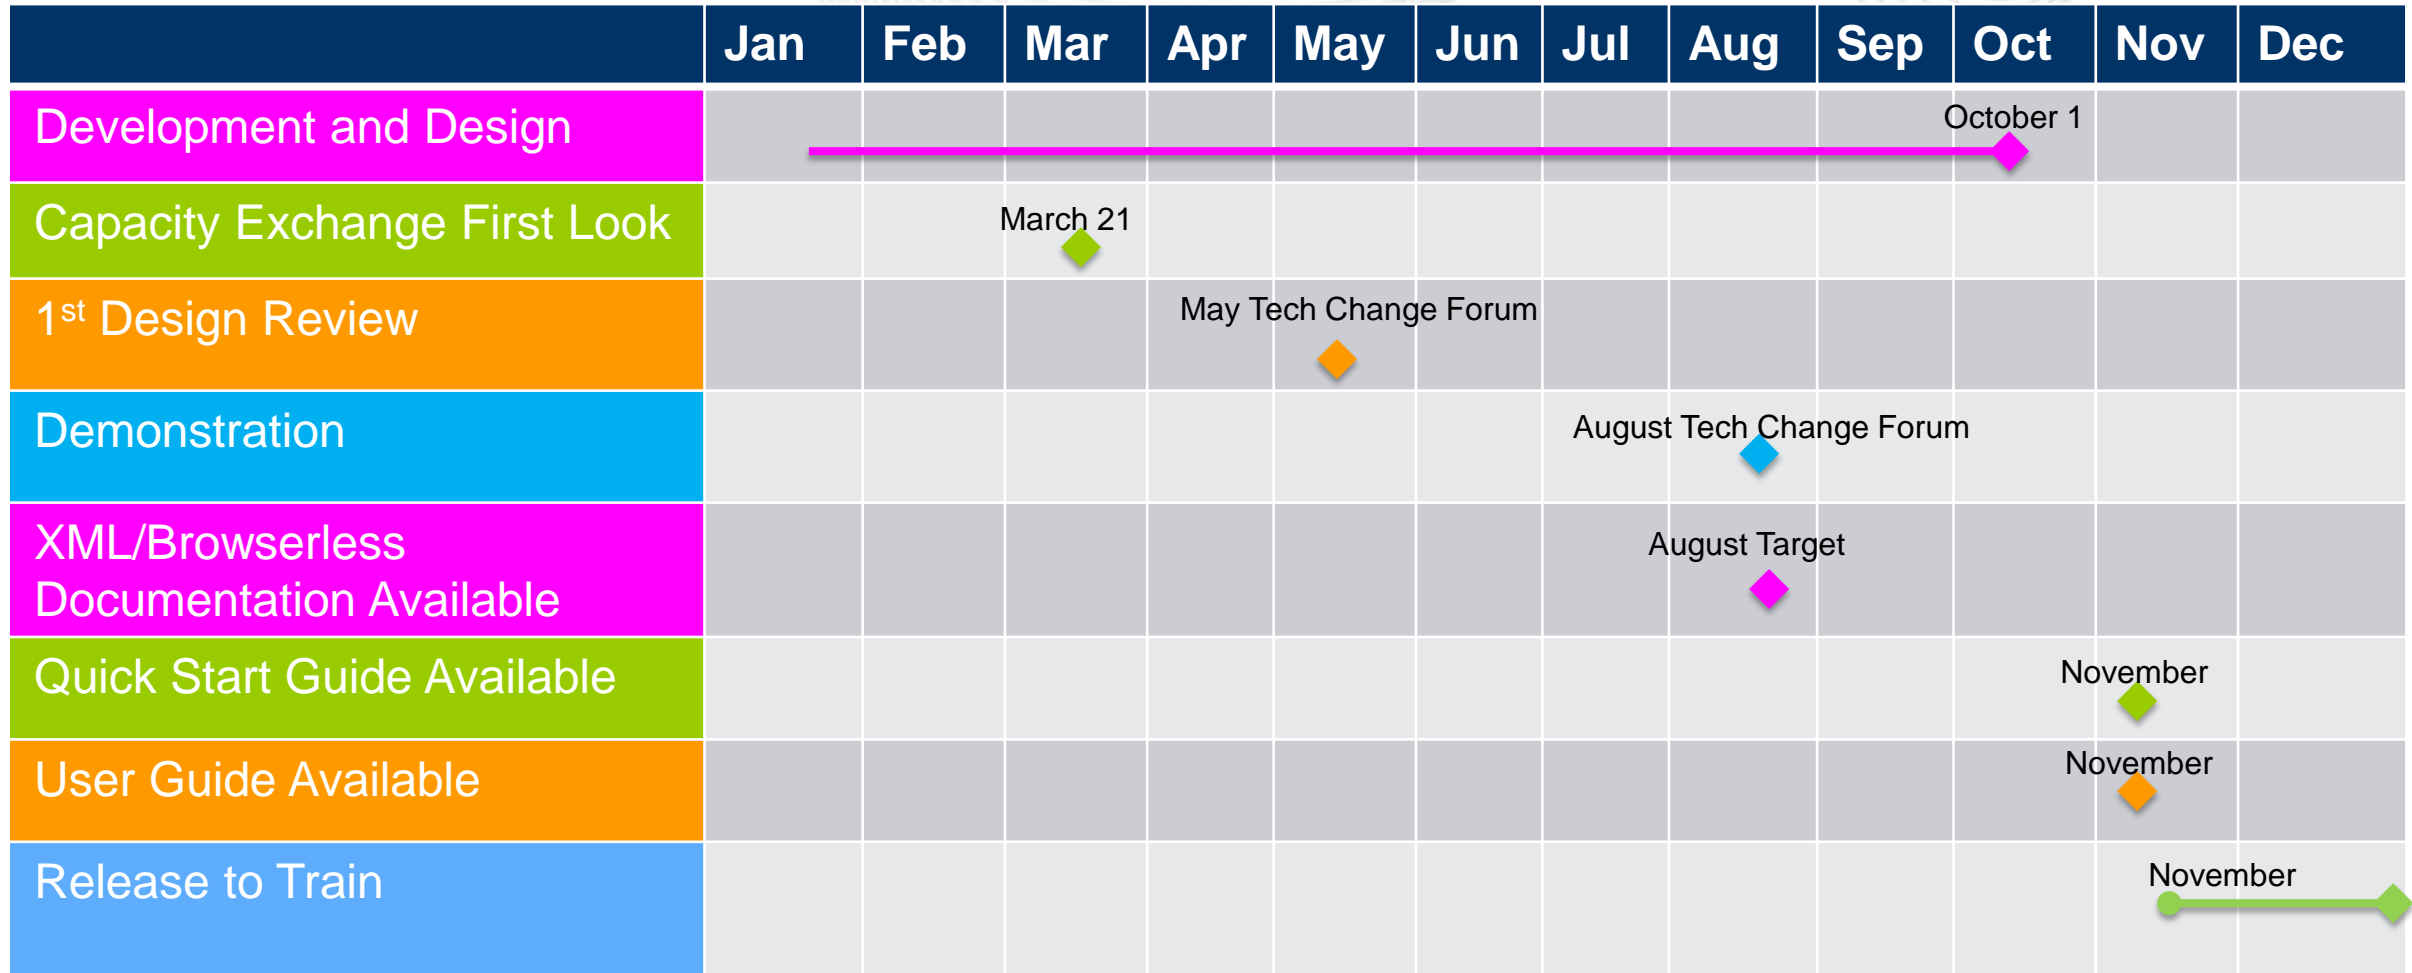

- Customers will be required to update/replace existing browserless configuration.
- At minimum participants will be required to update browserless to reference Capacity Exchange and utilize single sign on (SSO).
- Customers will be requested to participate in Testing/Train environment verification November, 2017.
- Multi-year project – Parallel operations planned for 2018 Q1.
