

A large, light gray, stylized sun graphic is positioned on the left side of the slide. It features a central circle with rays extending outwards, forming a semi-circle. The rays are represented by various geometric shapes like triangles and trapezoids, creating a sunburst effect.

MISO Interface Pricing Evaluation Update

Joint and Common Market

May 27, 2015

Updates

- **MISO stakeholder process**
- **Continued evaluation**
- **FERC engagement**

MISO Stakeholder Discussions

- **MISO is conducting a series of discussions at SMWG to facilitate broad understanding of the issues and proposed solutions and collect stakeholder opinions**
 - Define interface pricing problem with respect to basic principles and current practices
 - Description of alternative solution proposals
 - Evaluation of individual solution
 - Summarize and provide MISO recommendation
- **Stakeholders inquired the possibility of additional analysis using PJM's historical data**

Continued Evaluation

- **Joint evaluation with PJM**
 - Understand analysis described in PJM's white paper
 - Perform additional analysis using PJM's historical data
 - Address implementation concerns
- **Review of analysis performed by Monitoring Analytics**
- **Collaboration with MISO IMM for additional studies**
- **Joint evaluation with SPP**
 - Address questions and concerns
 - Perform studies related to the SPP interface

FERC Engagement

- **On Feb 24, 2015 FERC issued Order requesting additional information from MISO, PJM and the two IMMs on Interface Pricing and few other MISO-PJM JCM efforts**
- **MISO and PJM submitted joint comments on May 11**
 - Described the evaluation process and criteria and provided update on analysis performed
 - Proposed FERC-led technical conference to continue discussions

- **Contact**
