 - C. No additional agenda items were requested.

 - b. System Operation Subcommittee is meeting tomorrow to consider rules for small generators and CSPs to require certification of operators in their control centers.

DR Capacity Performance Administrative Process (9:30-11:15)

2. Mr. Pete Langbein, PJM, reviewed processes for DR CP in the 2016/2017 DY. The existing tariff requires CP registrations (and any other registration that may be substituted during product specific dispatch) to perform RRMSE test. This requirement was not intentionally put in tariff and expectation was that similar process to emergency energy M&V proposal approved by DRS would have been used. PJM intends to initiate process to clarify the existing tariff such that RRMSE tariff is not required and CBL process will leverage previously proposal approved at the DRS. CP capacity compliance will be handled separately from LDR/XDR/ADR capacity compliance. This item will remain on agenda for next meeting to continue clarification on DR CP implementation specifics.
