

### 2016 Transmission Task Opt-Out - Annual Review

Company	Common Task or Company-Specific?	Task Number	Task Statement	Reason for requesting Opt-Out	Initial PJM Recommendation	PJM Comments
Neptune RTS	Common	TO1	Given the daily load and weather forecast, evaluate your operating strategy in accordance with the appropriate PJM manuals	Weather events do not require Neptune RTS to take into account changes in load, since we do not directly serve any "Native" load. Operating strategies are determined by the PJM (The Operating Authority) for Neptune RTS.	PJM recommends this request be <b>APPROVED</b>	Given that there is no load directly served by Neptune, and any changes in the operation of the Neptune tie would be directed by PJM/LIPA, exemption from this task seems reasonable.
Neptune RTS	Common	TO6	Given a request for PJM operational information, respond in accordance with the appropriate PJM manuals	Reactive Reserve Checks or Supplementary Status Reports to PJM are not applicable to Neptune RTS.	PJM recommends this request be <b>APPROVED</b>	Since Neptune is not required to submit data for either RRC or SSR reports, then exemption from this task seems reasonable.
Neptune RTS	Common	TO8	Given a Voltage Emergency, respond to Emergency Procedures and take the appropriate actions in accordance with PJM manuals	Neptune RTS Operators take no actions during a given voltage emergency. The Reactive Power Control for the HVDC conversion process will respond automatically for voltage imbalances on the BES within the abilities of the equipment, operating parameters and protections. Neptune RTS Operators take directives from the PJM System Operator in event of an emergency.	PJM recommends this request be <b>APPROVED</b>	Any activities that Neptune would perform during voltage emergencies would be at the direction of their connecting TO's, and are covered under Task TO3. There are no Member Company tasks identified in the PJM Manuals for these procedures that Neptune can perform.
Neptune RTS	Company-Specific	TO 5.3	Given a monitored facility, explain how to utilize your company's security analysis, evaluate the results, and coordinate the results with PJM in accordance with company guidelines	Neptune RTS does not run security contingency analysis, Pre and or Post event on the BES. PJM does that for Neptune and dispatches them accordingly.	PJM recommends this request be <b>APPROVED</b>	Since Neptune RTS does not perform their own contingency analysis,(with PJM performing those studies on their behalf) exemption from this task seems reasonable.
Neptune RTS	Company-Specific	TO 12.5	Given an equipment outage request, model the outage in a network study program and analyze the results in accordance with company guidelines	Neptune does not perform outage studies PJM does that for Neptune and dispatches them accordingly.	PJM recommends this request be <b>APPROVED</b>	Since Neptune RTS does not perform their own outage studies, (with PJM performing those studies on their behalf) exemption from this task seems reasonable.

<b>UGI</b>	Company-Specific	TO 5.3	Given a monitored facility, explain how to utilize your company's security analysis, evaluate the results, and coordinate the results with PJM in accordance with company guidelines	UGI does not run security contingency analysis, Pre and or Post event on the BES. PJM and PL do that for UGI and PJM dispatches them accordingly.	PJM recommends this request be <b>APPROVED</b>	Since UGI does not perform their own contingency analysis, (with PJM and PL performing those studies on their behalf) exemption from this task seems reasonable.
<b>UGI</b>	Company-Specific	TO 12.5	Given an equipment outage request, model the outage in a network study program and analyze the results in accordance with company guidelines	UGI does not perform outage studies PJM and PL do that for UGI and PJM dispatches them accordingly.	PJM recommends this request be <b>APPROVED</b>	Since UGI does not perform their own contingency analysis, (with PJM and PL performing those studies on their behalf) exemption from this task seems reasonable.
<b>CPP</b>	Company-Specific	TO 5.3	Given a monitored facility, explain how to utilize your company's security analysis, evaluate the results, and coordinate the results with PJM in accordance with company guidelines	CPP does not run security contingency analysis, Pre and or Post event on the BES. PJM does that for CPP and dispatches them accordingly.	PJM recommends this request be <b>APPROVED</b>	Since CPP does not perform their own contingency analysis, (with PJM performing those studies on their behalf) exemption from this task seems reasonable.
<b>CPP</b>	Company-Specific	TO 12.5	Given an equipment outage request, model the outage in a network study program and analyze the results in accordance with company guidelines	CPP does not perform outage studies PJM does that for CPP.	PJM recommends this request be <b>APPROVED</b>	Since CPP does not perform their own outage studies, (with PJM performing those studies on their behalf) exemption from this task seems reasonable.
