

Black Start and Reactive Supply / Voltage Control Credits

August 18, 2015

MSS

- Black Start Credits
 - Black Start unit information is classified as Critical Energy Infrastructure Information (CEII)
 - CEII data has protection rules regarding disclosure
 - PJM's Performance Compliance Department maintains a contact list for release of unit specific Black Start data
 - Creating a settlements report that could be transmitted electronically or printed out could introduce compliance violations

- Reactive Supply and Voltage Control Credits
 - Unit specific data is not currently stored in settlements
 - Revenue requirements are posted by PJM on a company and zone basis
 - Each company files revenue requirement details with FERC
 - Filings can vary in degree of details for units
 - Posted revenue requirements and FERC filings can be used to obtain a detailed breakdown of individual generator contribution
