Webinar Announcement Generator Surveys

December 8, 2016 | 2:00 – 3:00 p.m. ET

Click here for: [Webinar Registration](#)

At the September 2016 NERC Operating Committee (OC) meeting, the OC approved the NERC Resources Subcommittee (RS) initiative to gather information through Generator Surveys to further analyze the Interconnections' frequency response. (Eastern, Western, and Quebec) and enhance dynamic modeling capabilities. The survey will request BES generator data for selected events. The purpose of these surveys is to gather information on the Interconnection's resources ability or inability to provide primary frequency response and help Generator Operators and Generator Owners in their efforts to obtain the ability to provide primary frequency response between Pmin and Pmax.

During the webinar we will discuss the specific data requested, format, and the logistics of submitting the survey form.

For more information or assistance, please contact [Sandy Shiflett](#) (via email) or at 404-446-2575.
