

Manual M-13 EOP-011 update

SOS, OC, MRC

Chris Pilong – Manager, Dispatch

- New standard effective 4/1/2017
- Consolidates and add minor changes to the following standards that will be retired:
 - EOP-001-2,1b
 - EOP-002-3.1
 - EOP-003-2

- Introduction: specified that M-13 is the PJM Emergency Operating Plan as required by EOP-011
- Updates to Section 2 and 5 to indicate that PJM will notify all internal TOPs if any TOP declares an emergency (EOP-011 requirement)
 - Also included requirements to issue an EEA3 for Manual Load Dump Warning and Voltage Reduction Action.
 - EEA3 is issued when “The energy deficient Balancing Authority is unable to meet minimum Contingency Reserve requirements”

- Creation of Section 7 TOP Operating Plan Submission and Review for EOP-011 compliance
- Modified all references to manual load shedding throughout the manual to clarify this should be implemented while minimizing overlap with automatic load shedding (EOP-011 update)
- Updated EOP-002 references to EOP-011

- Deleted Appendices 4 and 5 from Attachment K: Event Investigation Program and updated the link to the NERC Event Analysis documentation.
- Updated all Load Dump references to Load Shed
