Senior Energy Analyst – Union of Concerned Scientists

Tom Rutigliano
Senior Advocate – Natural Resources Defense Council

Will Kenworthy
Regulatory Director – Midwest Vote Solar

Dear Environmental Stakeholders,

Thank you for your correspondence dated September 22, 2021 providing your views on Federal Energy Regulatory Commission (FERC) Advanced Notice of Proposed Rulemaking (ANOPR) on transmission reform. We have appreciated your engagement on these issues at both the Interconnection Policy Workshops and at the Interconnection Process Reform Task Force.

The most recent workshop sessions were designed to receive feedback from stakeholders on the ANOPR and to provide PJM's thoughts regarding the same – as further informed by such feedback.¹ In accordance with the FERC-established comment schedule, PJM filed its initial comments on October 12 and is currently reviewing initial comments filed by others. PJM's comments address many of the topics addressed in your correspondence. We look forward to discussing the comments at the next workshop, scheduled for November 2.

Again, I thank you for your correspondence, and we look forward to your organizations' engagement in our stakeholder discussions and in the FERC proceeding.

Sincerely,

Manu Asthana
President and CEO, PJM Interconnection
