

**Modeling Generation Senior Task Force Report**  
**PJM Interconnection**  
**Members Committee Webinar**  
**March 18, 2019**

In 2016, several PJM members formed the Combined Cycle Owners User Group to work in partnership with interested and similarly situated stakeholders to discuss the design and operation of combined cycle units and their integration into the market and real-time operations of PJM. Over the course of several meetings the user group evaluated the models different RTOs/ISOs are using to model combined cycle units. At the conclusion of the education phase of the user group's work, the group came to the conclusion that a more detailed model for combined cycle units might be equally applicable to other steam units. The focus of the Modeling Generation Senior Task Force (MGSTF) is to consider expanding the model that is used in PJM's systems to improve the ability to represent the various components of all generation.

The March 15<sup>th</sup> meeting of the MGSTF was cancelled in order to provide PJM staff with additional time to develop short-term solution options for stakeholder consideration. At the April meeting, PJM present short-term solution options for stakeholder consideration and solicit feedback on both short and long term solution options.

**Next Meeting(s):**

March 15, 2019	9:00 a.m. – 12:00 p.m.	PJM Conference & Training Center/ WebEx
April 8, 2019	9:00 a.m. – 12:00 p.m..	PJM Conference & Training Center/ WebEx
May 17, 2019	9:00 a.m. – 12:00 p.m.	PJM Conference & Training Center/ WebEx
