

Co-Located Load Polling

November 17, 2022

MIC Special Session: Co-Located Load

- The facilitation team would like to conduct an informal poll to gather information on the level of support that currently exists for each package.
- The results of this poll are not binding. They will provide a data point to be used when determining next steps within the stakeholder process.

- Do you support the Constellation / Brookfield proposal?
 - Yes / No / Unsure
 - Please explain why or why not
 - If you answered No, are there any conditions under which you could support retaining CIRs for co-located load that does not take supply from the system? Please explain
- Do you prefer the Constellation / Brookfield proposal over the status quo?
 - Yes / No / Unsure
 - Please explain why or why not
- Do you support the IMM proposal?
 - Yes / No / Unsure
 - Please explain why or why not
- Do you prefer the IMM proposal over the status quo?
 - Yes / No / Unsure
 - Please explain why or why not

- Is there any objection to:
 - Publicly posting verbatim comments?
 - Attributing those comments to the company that submitted them?
- The approach decided here will be noted at the top of the poll so that respondents are aware how the comments will be shared.
- Poll will open on November 18 and will close at 5:00 p.m. on November 25.
