

Effective Date	August 1, 2015
Impacted Manual #(s)/Manual Title(s):	
Manual 20 : PJM Resource Adequacy Analysis	
Conforming Order(s):	
151 FERC ¶ 61,208	
Associated Issue Tracking Title:	NA
Committee Approval Path - What committee(s) have already seen these changes?	
Planning Committee endorsed changes at their 7/9/15 meeting.	
MRC 1st read date:	July 15, 2015
MRC voting date:	July 23, 2015
Impacted Manual sections:	
Introduce a new Section 6 to M-20.	
Reason for change:	
FERC's approval of the Capacity Performance filing requires that PJM calculate Limited-Availability Resource Constraints for use in the RPM auctions.	
Summary of the changes:	
This new section to Manual 20 describes the technical procedures PJM uses to compute the Limited-Availability Resource Constraints for use in the RPM auctions. Constraints are calculated on both an RTO and LDA basis. These constraints will be calculated for the Base Residual Auction and Incremental Auctions associated with the 2018/19 and 2019/20 Delivery Years.
