

Manual 14F – Revision 9

Joseph Hay
Infrastructure Coordination
Markets & Reliability Committee
March 23, 2022

- Biennial Cover to Cover Review
 - Two main changes to Manual 14F
 1. CEII Information in 14F was referenced to Manual 14B because 14B is the source document for CEII Information. This will eliminate the requirement to edit 14F whenever a change is made to 14B
 2. The use of the Secure File Transfer Tool to submit all proposals was replaced with the requirement to use “Competitive Planner” to submit all proposals. The Secure File Transfer Tool is still available and will be used to submit supplemental data on an “as needed” basis.

Sections 3.1 and 3.2 were edited to refer users to the existing CEII requirements in PJM Manual 14B.

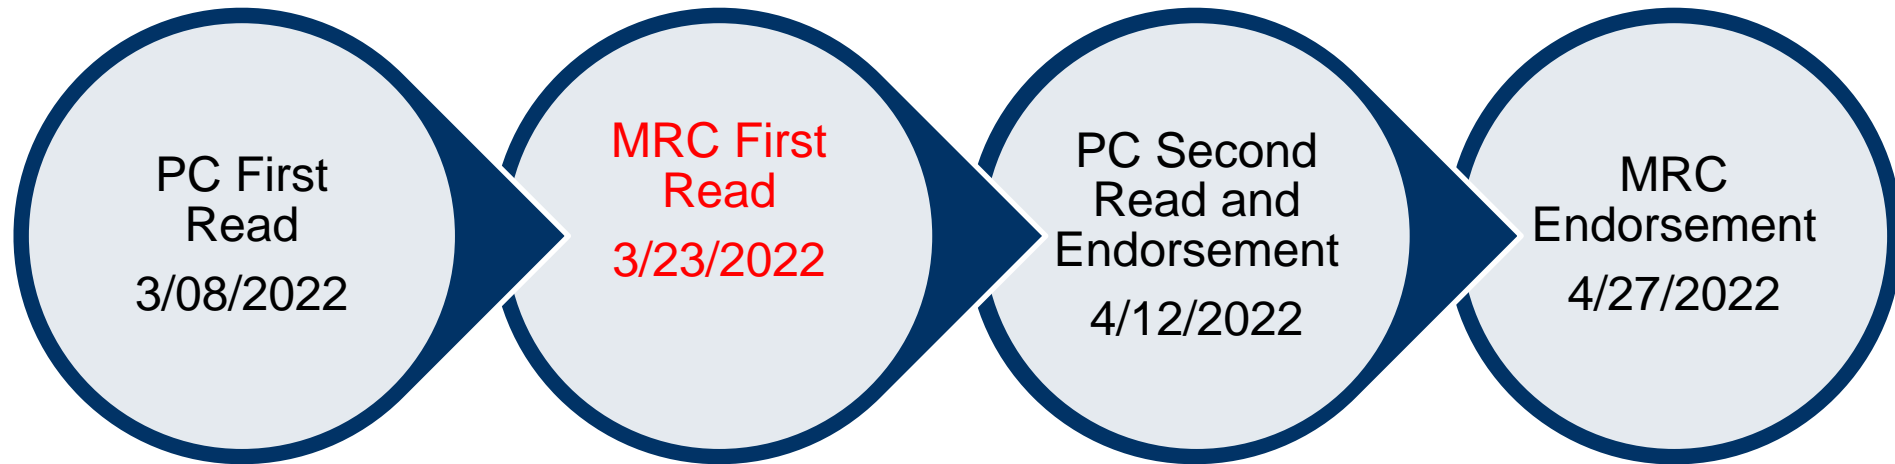

Section 4.2 was edited to reference existing CEII information in PJM Manual 14B

Section 6.1 was edited to include the requirement to use the Competitive Planner Tool for submission of all proposals

Section 6.2 Redaction Requirements was edited to reflect that all proposals can now be redacted in the Competitive Planner Tool

Attachment A: Critical Energy Infrastructure Information (CEII) was removed

Attachment B: The Secure File Transfer Tool information was clarified as a tool to be used for submitting supplemental proposal information as required
