

Transitional Resource Request Form

Per proposed PJM Tariff, Part VII, Subpart J, Section 400 and Manual 14B, Attachment K, an eligible resource that by March 3, 2023 either has a fully executed ISA (“existing unit”) or is active in the PJM interconnection queue (“existing queue unit”) and has submitted i) a CIR request into the New Services Queue that is deemed complete and has received a queue position in accordance with PJM Tariff Part VI, Section 201 and ii) a request to be considered as a transitional resource shall be considered in an annual transitional system capability study that will be performed prior to each Base Residual Auction during the transition period to determine the annual allocation of transitional system capability for the applicable Delivery Year. Please email the attached completed form to TRRequest@pjm.com if you would like your CIR uprate request to be considered as a transitional resource for this purpose. Proposed PJM Tariff, Part VII, Subpart J, Section 400 and Manual 14B, Attachment K, summer regional percentile output levels for wind and solar resources are posted along with the 1/25/2023 [Markets & Reliability Committee meeting materials](#). The legal effectiveness of proposed PJM Tariff, Part VII, Subpart J, Section 400, and Manual 14B, Attachment K is predicated on acceptance by the Federal Energy Regulatory Commission.
