10/17 GUCC Mtg. Materials of Notification Time Proposal Review

<http://www.pjm.com/~media/committees-groups/committees/oc/20141017/20141017-notification-startup-proposal-review.ashx>

Current Practice

- Generator Owners utilize the Notification Time field in eMKT to accurately reflect the time needed to begin the startup process.
- The MMU monitors participants' behavior.

2015 Update to Process

- The MMU is in the process of gathering information from Generation Owners regarding the use of notification times.
- The MMU will work with PJM and the Members to establish clear rules regarding the use of unit-specific notification times and bandwidths. This is part of the 2012 Notification and Startup Time Proposal. The prospective process is scheduled for implementation mid-2015. Manual, tariff and software changes are needed
