Also modify Requirements as needed to ensure they continue to address the additional Facilities. As needed, also define new Glossary Terms for all or some of the transmission-connected dynamic reactive devices noted in the SAMS white-paper “Transmission Connected Dynamic Reactive Resources – Assessment of Applicability in Reliability Standards”. ➤ NERC announced additional nominations are being sought for Standard Authorization Request (SAR) drafting team members. ➤ Unofficial Nomination Form (Word) ➤ Submit Nominations 	<p>Standard Authorization Request (SAR) Drafting Team Nominations</p>	<p>05/20/2021</p>

- [Standards Efficiency Review Final Report](#) Posted for Informational Purposes
 - Background: The Standards Efficiency Review is a multi-phase project that began in 2017 based on input from the NERC Member Representatives Committee and a focus area for the ERO Enterprise Long Term Strategy to capture effectiveness, efficiency, and continuous improvement opportunities. The posted report outlines accomplishments and recommendations from the project.
