January 2024  
NERC Compliance

**STANDARD:  
MOD-026**

## [Project 2020-06](#) Verifications of Models and Data for Generators

### PROJECT BACKGROUND:

New proposed terms (to be included in the *NERC Glossary of Terms*)

**Inverter-Based Resource (IBR):** A source (or sink in the case of a charging battery energy storage system (BESS)) of electric power that is connected to the electric power system (transmission, sub-transmission, or distribution system), and that consists of one or more IBR Unit(s) operated as a single resource at a common point of interconnection. IBRs include solar photovoltaic (PV), Type 3 and Type 4 wind, BESS, and fuel cell.

**IBR Unit:** An individual device, or a grouping of multiple devices, that uses a power electronic interface(s), such as an inverter or converter, capable of exporting Real Power from a primary energy source or energy storage system, and that connect together at a single point on the collector system.
