# Dominion Transmission Zone: Supplemental Customer Load Request

**Need Number: DOM-2018-0016**

**Meeting Date: 9/28/2018**

**Process Stage: NEED**

**Supplemental Project Driver: Customer Service**

### Problem Statement:

DEV Distribution has submitted a DP Request to replace their existing transmission to distribution transformer at Remington Substation in Fauquier County with a higher capacity bank to meet customer load. Requested in-service date is 11/15/2019.

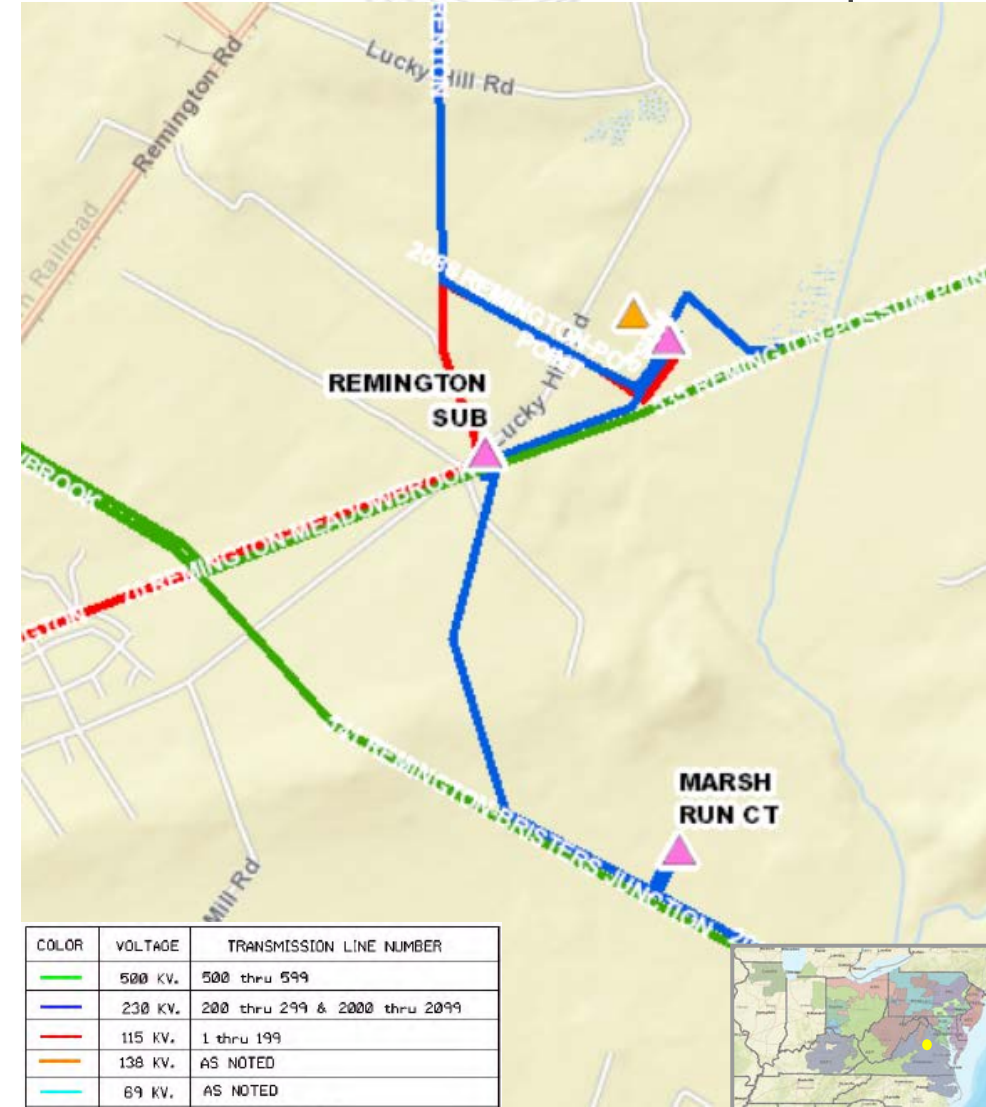

### Projected Peak Loading In The Next Five Years

Summer: 105 MW

Winter: 109 MW

### Specific Assumption References:

Customer load request will be evaluated per Dominion’s Facility Interconnection Requirements Document and Dominion’s Transmission Planning Criteria.
