

Stakeholder Process Forum History & Structure

Dave Anders
Director, Stakeholder Affairs
Stakeholder Process Forum
February 22, 2021

- Following approval of the Consensus Based Issue Resolution Process and Manual 34 in August 2010, The co-chairs of GAST, the GAST external facilitators and the PJM lead formed an implementation team to help ensure successful implementation of the new process.
- The implementation team met weekly for several months to review experiences and plan for upcoming stakeholder meetings
- Once the new CBIR process was launched, the implementation team recognized that a venue for stakeholders to engage in dialogue regarding the stakeholder process – both the rules of the process in Manual 34 as well as the practices in implementing the rules – would enable stakeholders to address perceived needs for process/practice enhancements before concerns would become too great
- The implementation team recommended establishing a regular/recurring opportunity to achieve this purpose
- The Stakeholder Process Forum is the venue that stakeholders agreed to establish to meet this need

- **Format**
 - Intended to be an informal dialogue, aimed at exploring opportunities to enhance stakeholder process effectiveness efficiency
 - Any recommended revisions to rules in Manual 34 would be recommended to the Members Committee for approval
 - Any changes to practices would be implemented
 - No formal decision-making – consensus (defined as no objection)
- **Added to M34**
 - Revision 2, April 2012
- **Experience**
 - Many enhancements vetted – both practices and Manual 34 revisions (which were approved by the Members Committee)
 - Recent concern regarding decision-making
