Gen Model

- MOD-32 Overview

- We are still working on September demonstrations
- We will communicate them once we have them
- If there are any demonstrations you would like to see please email TechChangeForum@pjm.com

Product(s)	Date	Issue
<ul style="list-style-type: none"> • Data Miner • Data Viewer • eDataFeed • PJM Now 	July 29	<p>An AGC update caused unanticipated impacts to the ACE values sent to downstream applications.</p> <p>This caused stale ACE data between 1:10PM and 3:30PM in external PJM applications. PJM operators did have access to ACE information during the event.</p> <p>The problem was related to a performance enhancement update that was not rolled out across all environments prior to a hot weather related application change freeze. The inconsistency led to the impact to downstream applications. The update was deployed to the remaining environments to resolve the issues.</p>

Product(s)	Date	Issue
<ul style="list-style-type: none">Operational Data Page	August 13	The operational data page was supposed to be retired on July 31 but this was delayed until August 13. Some users may have observed stale data while the site was not updated until the link was redirected to Data Miner.
