Product Details

- Market Settlements Reporting System (MSRS) is a tool used by market participants to retrieve market settlements reports and monthly billing statements.

- Improve browser compatibility

- Create consistent User Interface (UI) look and feel, similar to other PJM Tools applications

- Create supportable framework for PJM development staff to manage new report development and changes

- Implement standard token based security for authentication.

  – This is a requirement for access of the refreshed MSRS application

- Maintain current Single User Multi Account (SUMA) capability

- Improve report request performance

- Support enhanced functionality

- Minimize impact to users for browserless report requests
  - Maintain API protocols and standards

- Token based authentication will replace the current basic authentication
  - Consistent authentication protocol with other PJM Tools applications
  - It is recommended members begin using SUMA once this transition is made to reduce account management time and certificate cost. This work can begin immediately.
  - Additional information can be found here: https://pjm.com/-/media/etools/account-manager/single-user-multi-account-quick-start-guide.ashx?la=en
  - Token based authentication is mandatory to utilize the refreshed MSRS
- Reports will not be viewable on the current UI with the exception of billing invoices

- Reports can still be downloaded in CSV, XML, and PDF formats through the UI
  - PDF format applies to billing invoices
  - PDF format will be slightly modified, but with same data content
- UI pages will be redesigned
  - New landing page
  - Enhanced shopping cart functionality

- Comments, suggestions, questions please send to mss@pjm.com
