1.0) Introduction

This set of minimum design standards was developed by the Designated Entity Design Standards Task Force to assure a minimum level of robustness is provided such that the new competitively-solicited facilities would not introduce a weak point in the system in terms of performance. The task force consists of PJM Transmission Owners, PJM Transmission Developers and other PJM Stakeholders.

2.0) Applicability

The minimum design standards included in this document are required for all competitively solicited projects which are required to sign the Designated Entity Agreement. Adherence to these minimum design standards will be a consideration in the RTEP Proposal Window selection process.

In addition to the requirements included in this document, designated entities must act in accordance with all PJM and industry requirements as described in Section 4.0 of the Designated entity Agreement.

3.0) System Protection and Control Design and Coordination Minimum Required Standards

4.0) Substations Minimum Required Standards

5.0) Transmission Lines Minimum Required Standards
