

DR CP Winter Peak Load Calculation

Issue Source

EKPC is bringing this issue forward for consideration.

Stakeholder Group Assignment

PJM recommends this work be assigned to the Demand Response Subcommittee (DRS). The DRS is focused on demand response related items, including registrations.

Key Work Activities

- 1) Review existing WPL calculation language to consider an exception for routine maintenance outage during PJM winter peak days.
- 2) Review application of add backs for Load Management and Economic DR events to retail customer WPL calculation and recommend tariff and/or manual modifications, as appropriate.

Expected Deliverables

- 1) Governing Document and Manual 18 revisions as necessary

Expected Overall Duration of Work

Expect work will take 6 months

- September MIC first read.
- October MIC approval

Decision-Making Method

Tier 1, consensus (unanimity) on a single proposal – if feasible.
