

CSP and LSE review process for Economic DR registrations

DRS
7/23/19

- CSP must check on regular basis that all confirmed economic registrations maintain accurate LSE. If end customer switched LSEs after registration was confirmed, CSP must terminate the registration and create a new one with correct LSE.
- LSE should verify on regular basis that all customers under assigned to them registrations have a valid contract with them. LSE should contact PJM if they identify a registration whose load is not being served by them. PJM will terminate the registration and contact CSP.

- LSE can view all assigned to them confirmed economic registrations on Registration tab in DRHUB
