

10/2 Load Management event follow up items

Demand Response Subcommittee
December 9, 2019

- (OC Report) – Review existing EP posting.
 - IMPORTANT: DR Hub web service notification is PJM's primary means to communicate LM dispatch instructions to CSPs
 - EP is a backup
 - LM event that triggers PAI with start time later than posting time could be confusing
- EP email (dispatch and release) needs to be refined
- EP had duplicate notice (next day) of release of each event
 - Fixed – this was a DR Hub integration issue

- Contact information if CSPs have questions during LM dispatch
 - Contact PJM Control Room, DR Ops or Member Relations hotline
- PJM dispatched voluntary Base even if CSP reported 0 Expected Load Reductions
 - No change – this was done to allow CSP flexibility to decide which customers to dispatch or not dispatch.
