Normal Operations Self-Certification Pending

Click icon to see Self-Certification Text and Accept

I am a duly authorized representative of the Curtailment Service Provider and hereby certify that energy market settlements for Economic DR load reductions will only be submitted for hours when the load reductions (e.g. the output of on-site generation) would not have otherwise been implemented absent participation in the PJM wholesale energy market. I further certify that that following activities are not offered or settled in the PJM wholesale energy markets: load reductions (from an On-site Generator or otherwise) implemented regardless of participation as an Economic DR resource, to manage the customer's electricity cost, as part of expected operations for the operating day, based on commitment to export power as a Capacity Resource, to export power to receive associated energy revenue or otherwise. I understand that PJM Interconnection, L.L.C. ("PJM") and PJM Settlement, Inc. ("PJM Settlement") will rely on this certification as evidence that Participant meets all requirements for participating in PJM's Energy Interchange market, as set forth in the PJM Open Access Transmission Tariff ("PJM Tariff"), the Amended and Restated Operating Agreement of PJM Interconnection, L.L.C. ("Operating Agreement"), the Reliability Assurance Agreement Among Load Serving Entities in the PJM Region ("RAA"), and in the PJM Manuals.
