

# DRS year end review and thoughts for 2021

Demand Response Subcommittee  
January 8, 2021

- ✓ First DY for 100pct CP (no Base) or Summer DR
  - ✓ Major increase in load data coordination between CSP & EDC to calculate WPL
- ✓ MOPR
- ✓ COVID-19 impacts
- ✓ Order 2222
- ✓ Several DR Hub updates
  - ✓ PRD administration

Unexpected MOPR orders dominated the focus

- Order 2222 – DER/DR (especially impact of injections)
- Finalize PRD bill credit changes
- Refine MOPR administrative process
- Update Manuals for new Load Management Test requirement
- Implement Fast Start DR changes (waiting for final FERC order)
- Implement Peak Shaving Adjustment in DR Hub
- Consider pnode (instead of zone/zipcode) for dispatch and energy settlement – postponed in 2020

There has been a lot of change and we need to recognize the value of stability for market participants
