

2018 Spring System Restoration Drill Invitation Update

March 2018

Alpa Jani, Dispatch

Joint System Operations Subcommittee Meeting

Operating Committee

Market Implementation Committee

System Restoration Coordinators Subcommittee

- Spring Restoration Drill is planned for Tuesday, May 15 and Wednesday, May 16
- Spring Restoration Drill invitations will be issued on Monday, March 19
- For the 2018 PJM Spring Restoration Drill, the invitations will be sent via email and confirmation for participation will be completed via the PJM survey tool
 - The invitations will NOT be issued from LMS, the transition to the new survey tool will allow for a consolidated tool and tracking for all participants
 - Drill participation will continue to be tracked in the LMS

- The email will be sent to the following contacts associated with the units listed in the TO Restoration Plans:
 - Transmission Operator Contacts
 - Generator Operator Contacts (listed in the Resource Tracker Tool)
 - Training Liaisons (listed in the LMS tool)
- Please note: If there is more than one Transmission Operator or Generator Operator contact for the unit listed in PJM's records, an email with the survey link will be sent to each contact. At least one recipient must respond (multiple responses may be submitted to confirm participation).

PJM Transmission Operator or Generation Operator,

On Tuesday, May 15 and Wednesday, May 16, 2018, PJM will be conducting a system-wide RTO restoration drill. On **Thursday, May 10**, communication systems for the drill will be tested.

To make the training and learning experience of the restoration drill as successful as possible, PJM is requesting your participation in this exercise. You are requested to participate in the restoration drill based on having unit that meet the following requirements: nuclear unit(s), black start unit(s) or unit(s) with a hot time to start of 4 hours or less. This request is in order to be compliant with NERC Standard EOP 006-2, R10.1.

Each Reliability Coordinator shall request each Transmission Operator identified in its restoration plan and each Generator Operator identified in the Transmission Operators' restoration plans to participate in a drill exercise or simulation at least every two calendar years.

Communications is an extremely important part of any restoration. For this drill, it is imperative, because with the absence of telemetered data, PJM will be updating our Operator Training System (OTS) manually and complete our drill log with the information provided by your system operators. This information should include:

- An initial assessment
- Unit availability
- Units brought online (Hourly Generation Report)

Confirm your participation in the drill by responding to the survey below with your participation. If an alternate phone number is to be used during the drill, please provide it.

[Take the Survey](#)

- TO/GO contact will be requested to click on the survey tool link to confirm participation.
 - Participation: Yes or No
 - Alternate phone number for participation
