Existing Requests Dashboard Updates

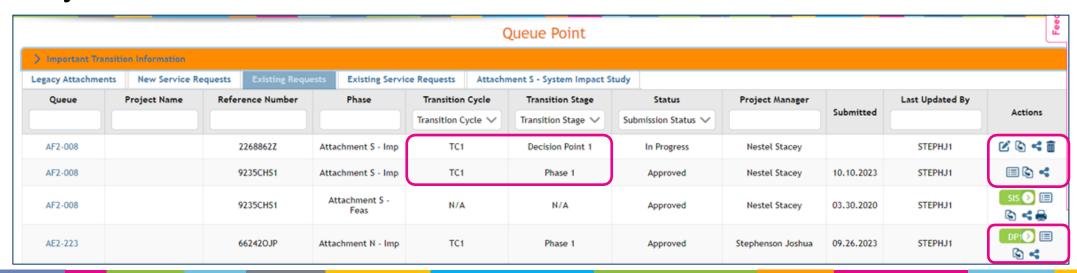

- Transition Cycle and Transition Stage will update for all transitioning projects (Expedited, TC1, or TC2).
- The Important Transition Information banner will be updated and will include the Site Control Review Spreadsheet.

Decision Point 1 Submission Process

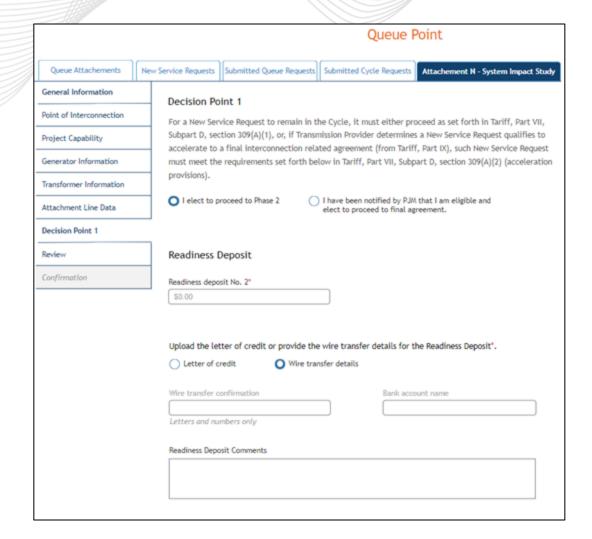

- A "DP1" button will be enabled only during Decision Point 1. The button will be removed upon the close of DP1.
- Phase 1 records will remain read only. The data will be copied to the Decision Point 1 submission.
- Only one Decision Point 1 submission can be created.

Decision Point 1 Project Data

- All existing fields are editable
- Decision Point 1 form is new
- Elect Phase 2 unless notified by PJM of acceleration eligibility
- One file or zip per category
- Must Save and Validate then move onto the Review tab to submit

www.pjm.com | Public PJM © 2024

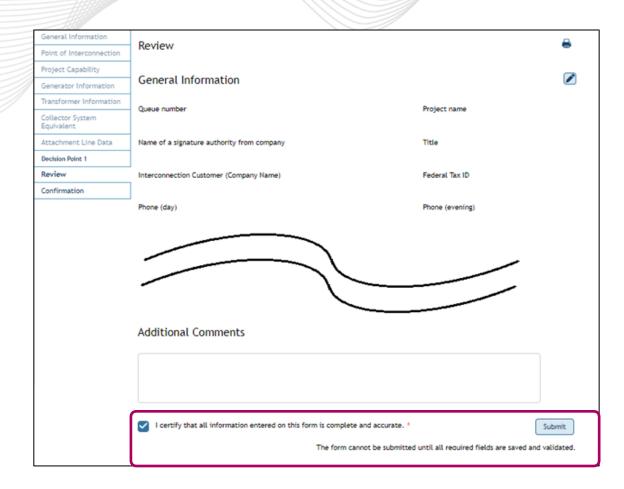

- SecureShare is used for all site control documents that are too large to be uploaded into Queue Point
- New mailbox for all site control SecureShare submissions:
 IPSecureShare@pim.com
- Send all site control SecureShare submissions to the new mailbox <u>AND</u> your PJM PM with the Queue Number in the subject line
- Instructions for using SecureShare: https://pjm.com/markets-and-operations/etools/secure-share

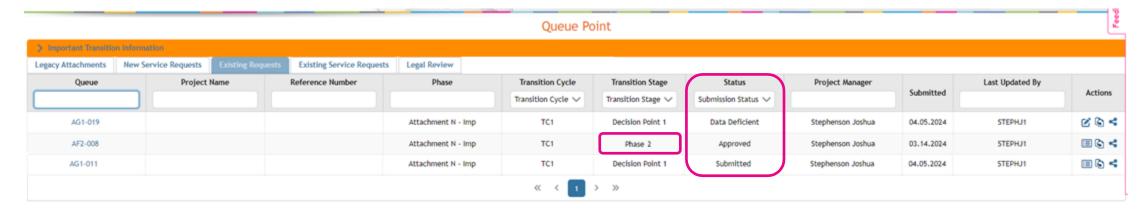

Submitting Decision Point 1 Information

- Developers must click Submit to complete the submission process.
 Drafts will not be reviewed.
- A confirmation email will be sent upon submission. Contact the PJM PM if a confirmation email is not received.

- DP1 record status will change from "In Progress" to "Submitted" once submitted to PJM.
- Unsatisfactory submissions will be marked Data Deficient and must be updated within 5 Business Days.
- Approved submissions will have a status of Approved with a stage of Phase 2. No further action is required from the developer.
