

Frequency Response

PJM's response to FERC Notice of Inquiry

Commission is seeking comment on:

- Amendments to the pro forma LGIA and SGIA for NEW and/or EXISTING resources to have frequency response capabilities as a precondition to interconnection
- Frequency response performance of existing resources and whether primary frequency response requirements are warranted
- The need for a requirement to provide and compensate for primary frequency response.
- The nature of frequency response compensation within the context of current RTO/ISO market optimization processes.
