

Required Meteorological Data for Solar Forecast

Joseph Mulhern
Sr. Engineer, Generation

March 5, 2018

- 2017 Manual Changes
 - In 2017, the MRC endorsed changes to Manual 14D that require real-time meteorological data for solar parks > 3 MW
- 2018 Implementation Strategy
 - In March, PJM will contact Generator Owners that own applicable solar parks to develop implementation plan
 - Following this, PJM will work with solar park owners to set up data transfer connections based on PJM Manual 1 Requirements
 - PJM is targeting Q4 2018 to receive meteorological data from all applicable plants
