

Market Settlements Subcommittee
Conference Call
July 21, 2015
1:00 p.m. – 4:00 p.m. EST

Administration

Welcome, review of Anti-Trust Policy, Code of Conduct, Media Participation Policy and roll call.

Approval of Agenda and the June 16, 2015 draft MSS minutes.

Mr. Ray Fernandez, PJM, went through a few administrative items at the beginning of the meeting:

- Timely submittal of InSchedule and Power Meter Data: PJM is still receiving requests to extend the data submittal deadlines for InSchedule and Power Meter data despite both official deadlines being extended beginning June 1, 2015. PJM requests that participants contact Market Settlements with any reasons why data submittals are not meeting the new deadlines.
- Reorganization of Market Settlements content on PJM.com: PJM has been working to streamline content and organization in the markets and operations section of pjm.com to ensure members can quickly and easily find information on the PJM website. The new Billing, Settlements and Credit section of pjm.com is the seventh revised section to be updated; it combines the Market Settlements and Financial Credit sections. The new pages condensed the number of pages from 29 to approximately 21, so that you don't have to click through as many pages to find information you need. The page has been reorganized into a two column layout to make it easier to quickly scan the page and locate content. Lastly, the billing, settlements and financial credit information have been consolidated in one section to make it easier for you to find what you need - including relevant training, manuals and documents that are found on other sections of the website.
- New MSRS Report Requests: Requests were made at the June meeting to create new MSRS reports that provide supporting details for Black Start and Reactive Supply credits. PJM will provide an update on the status of the request at the August meeting.

Working Issues

1. Capacity Performance Settlement Impacts

Ms. Terri Esterly, PJM, reviewed an example illustrating how the RPM Final Zonal Capacity Prices will account for the Transitional Incremental Auctions for the 2016/2017 and 2017/2018 Delivery Years. The cost of the additional Auction Credits (\$/MW-Day) required as a result of Capacity Performance Transition Incremental Auctions will be represented as a separate cost component in the Final Zonal Capacity Price. The CP Transition IA cost component will be the same for all zones in the RTO.

Mr. Ed Rich, PJM, reviewed proposed settlements reporting changes to account for the transition to Capacity Performance in the RPM Market. A separate Billing Line Item will be added to the PJM Billing Statement to separately identify the additional Load Charges attributed to the Capacity Performance

Incremental Auctions and will be effective with the first weekly bill issued after June 1, 2016. In addition, the Locational Reliability Charge Summary MSRS Report will be modified for the 2016/2017 and 2017/2018 Delivery Years to clearly illustrate the separate cost component.

2. Network Service Peak Load Data Submission

Mr. Ray Fernandez, PJM, reviewed the submitted problem statement and issue charge regarding market data consistency for NSPL and PLC daily zonal scaling factors. He presented a proposal to enhance eRPM to calculate and apply a daily scaling factor to NSPL values in addition to PLC values. Discussion followed regarding whether the proposed solution addresses the main concern of the problem statement, that being the lack of transparency to whether EDCs apply scaling factors before they are loaded to eRPM. PJM will continue to work with First Energy, the company that raised the issue, to determine next steps.

Miscellaneous Settlements Items

PJM will provide an update on any recent settlement calculation and report changes.

Future Agenda Items

Participants will have the opportunity to request the addition of any new item(s) to the agenda of a future meeting.
