

2024 FERC Form-715

Mark Kuras

NERC Compliance

March 11, 2024

- Reasons FERC requests this data
 - To make it available to industry representatives to perform analysis to confirm results determined by reliability studies
- Applicable to Transmitting Utilities
- PJM gathers and submits this filing as a service to PJM Transmission Owners
- PJM interacts with FERC staff if there are questions
- Portions are considered Critical Energy Infrastructure Information (CEII)

- No changes to the request this year
- **Due March 25, 2024**
- All TOs must Supply a Part 1 identifying a Certifying Official and a Contact
- PJM will supply base cases and Study Reports
- If other Part submittals have not changed, we can send in previous submittals
- Use the email feature of Secure Share to submit

- Contact me if you have questions
 - mark.kuras@pjm.com
 - 484-994-8324
- Fill out a PJM CEII Request Form for downloading capability
 - <https://www.pjm.com/library/request-access.aspx>

FERC Form No. 715

FERC has determined that to satisfy section 213(b) of the Federal Power Act, potential customers must be able to reasonably anticipate the outcome of technical studies a transmitting utility would perform that assess the availability of transmission capacity to satisfy a request for transmission service. Therefore, each utility or its designated agent must submit an annual report. PJM reports this information to FERC on behalf of all of its transmission owners.
