

Update on FERC Paper Hearing on PJM Capacity Capability Rules

Thomas DeVita, Sr. Counsel
Office of the General Counsel
April 27, 2020
Capacity Capability Senior Task Force

1. In an April 10, 2020 order* FERC granted in part PJM's abeyance motion on the 10-hour rule paper hearing, albeit with a sooner deadline of Oct. 30, 2020 vs. original request of Jan. 29, 2021.
2. FERC also expanded the existing paper hearing to include the capability determination rules for all resources, which PJM had previously filed at FERC's direction on Dec. 12, 2019 in Docket No. ER20-584.
3. Docket No. ER20-584 is now consolidated with Docket No. EL19-100. All future filings to be made solely in Docket No. EL19-100.

What About Demand Response and Energy Efficiency?

1. Both FERC and PJM's prior use of the term "all resources" in these proceedings has referred to only those resources under RAA, Schedule 9 and Manual 21, which do not include DR or EE.
2. When filing its capacity capability rules for "all resources" in these proceedings, PJM explicitly excluded DR—a fact that FERC repeatedly noted in the April 10 Order and did not challenge or reject.
3. The stated purpose of the expanded paper hearing established in the April 10 Order on the capacity capability rules for "all resources" is to address the issues already present in these proceedings (which do not include DR or EE).
4. The CCSTF Issue Charge explicitly excludes DR, and Commissioner Glick cited to the CCSTF's work plan, indicating Commission awareness of its activities.

Oct. 17 2019

- PJM compliance w/ Order 841 largely accepted.
- FERC opens Sec. 206 proceeding: 1) time-related capability rules of all resources and 2) paper hearing on capability rules for ESR (“10 hour rule”).

Apr. – Aug.

Capacity Capability Sr. Task Force to consider ELCC.

Oct. 30, 2020 FERC deadline for filing ELCC.

Mar. 31, 2021

PJM contingent target for latest completion of upcoming 2022/23 Base Residual Auction.
