

AI #	Action Item	Status	Owner	Completion Date	Type
11	Do a backcast of a possible transaction rate (design component 4, option A) to see what it would look like	In Progress	Ray Fernandez		Target 6/19 meeting
14	Need clarification of exports and their role in uplift (we have this for imports already)	In Progress	Adam Keech		
18	Put together slides for "transaction in the supply and demand deviation category"	In Progress	Ruta Skucas		
22	Look into how other ISOs and RTOs allocate uplift costs	In Progress	Laura Walter		
23	Summarize what we've already done or what is in the SOM related to causes of uplift. Can start with Action Item #30 and show those in order of precedence. Include seasonality or unusual events in the analysis.	In Progress	Adam Keech and Brian Weathers		July 1st meeting
24	Members to submit solution options for the matrix	In Progress	Barry Travers, Bruce Bleiweis, David Hastings		
25	PJM to clarify row 17 option B if this is different from status quo (RT Load (metered), RT Exports --- Deviations + RT Imports (Interchange Deviations from DA schedule for imports and exports))	In Progress	Suzanne Coyne		finish all Ais by August 13 meeting. Will target to get some finished by July 17.
26	Reach out to PJM Planning team to determine what information they are gathering regarding minimizing uplift	Not Started			
27	PJM to review MISO cost causation analysis	Not Started			
28	What is "alternate supply resources"? (in DC4 option D)	Not Started			
29	Stakeholders to develop list of questions that they would like answered (to help guide the types of analysis that PJM needs to do and the types of data that needs to be collected)	Not Started			
30	PJM to develop a method to catalog and track questions	Not Started
