35	Will need some analysis on costs and rates for all proposals in order to better understand the impact	Not Started	Stakeholders	
49	Netting questions: 1. How does PJM determine if a unit is "following dispatch"? 2. Go one level down to describe each component in that determines DA and RT withdrawal and injection deviations and which location (zone, interface, hub) they apply to. 3. Provide more details on generation deviation netting as currently done today. 4. Provide more details and specific examples on Transaction Netting as described in the Phase 2 matrix for a few of the packages. 5. Provide more details and specific examples on Generation Netting for generator replacement	In Progress	PJM
