

# MGSTF

## Next Steps Recommendation

Glen Boyle  
Manager, Performance Compliance  
Modeling Generation Senior Task Force  
May 15, 2020

- Originally chartered in February 2017
  - Expected completion June 2017
- Key Work Activities
  - Review the work of prior groups addressing the model of combined cycle units.
  - Promote understanding of generating plants and their need for a more flexible model.
  - Identify market rules/mechanisms to integrate generation resources into PJM's markets such that their operating characteristics are understood, are properly modeled and adequately compensated.
  - Identify necessary changes to OA, Tariff, and manuals needed to implement any new model.

- Stakeholder Requirements document created
  - Shared with GE
  - Used to inform nGEM implementation
- Hourly segmented ramp rates
  - In process of implementation
- Additional offer segments
  - In process of implementation
- Soak Time
  - Failed vote at MGSTF

- Refine Requirements document (priorities, implementation feasibility)
  - Schedule one future MGSTF meeting
- Request sunset of MGSTF at May/June MRC
- Provide updates to nGEM implementation at MIC meetings
  - Quarterly
  - Increase frequency if needed to discuss implementation design
