

External Capacity Performance Enhancements – Package B

New Requirements for Pseudo-tie Resources – Package B

	16/17 DY	17/18 DY	18/19 DY	19/20 DY	20/21 DY
Existing Resources	17 + 17A or non-viable	17+17A or non-viable	17+17A or non-viable	17+17A or non-viable	1 st half of matrix or non-viable
New Resources	N/A	N/A	N/A	N/A	1 st half of matrix

17 = Congestion Management Costs

17A = ARR Infeasibility Costs

1st half of matrix includes new requirements for unit specific transmission service, ongoing external upgrade costs, operational modeling requirement, FFEs/FFLs, earlier timelines for notification, etc.

From 20/21 DY and forward, requirements for all resources that pseudo-tie into the PJM market will be identical which will provide consistent capacity commitments from external and internal resources and enhanced reliability for PJM load.
