

Changes found in the April 2021 DR Hub XSD release are shown below.

Note: All users should (at a minimum) be at the February 2021 release level by April 15, 2021. Items included in this release will not be available to implementations using a prior release.

Prior to updating or replacing any XSD, backup existing versions of the current XSD and any in-house changes you've made prior to this release.

It is advisable to perform a file comparison between the XSD you are using today and the XSD you are migrating to.

Please verify all changes prior to implementation.

The April 2021 XSD changes are as follows:

Added: The below element has been added in support of changes affecting EDC/LSE approvals and verification.

```
<xs:element name="lseEdcReviewStatus" type="tns:registrationInputStatusEnum" minOccurs="0"/>
```

New elements added to section <xs:simpleType name="registrationFieldEnum">

```
<xs:enumeration value="EXT_LSE"/>
<xs:enumeration value="EXT_LSE_EDC_REVIEW_STATUS"/>
<xs:enumeration value="LSE_EDC_REVIEW_STATUS"/>
<xs:enumeration value="MOPR_EXCEED_HISTORIC_EXEMPT"/>
```

End of Change List
