

Tools Refresh – Emergency Procedures Application

Chidi Ike-Egbuonu
Outage Analysis Technologies

Training – 01/15

- Background
 - Timeline
 - Changes to User Interface
 - Application Access
 - Browserless XML Changes
 - Application Demo
 - Scheduled Future Enhancements

- The Emergency Procedures application was created to make everyone aware of emergency conditions currently occurring in PJM.
 - First posting created in 1999.
 - PJM members also notified of emergency conditions via All Call messages.
- PJM Manual 13 (Emergency Operations) defines the emergency conditions and expected responses.

- Guest login access granted to non-PJM personnel via:
 - eSuite.
 - Emergency Procedures link on pjm.com.
 - Emergencies button on eData.
 - OASIS → System Information → Emergency Procedures.
 - eDART → PJM Status Report → SSR Report

- Scheduled Future Enhancements

- January 2015
 - Online training demo.
- February to March 2015
 - Parallel Operations planned.
 - Sandbox version of new tool available.
- March 2015
 - Production release of initial enhancements.
- June 2015
 - Production release of Phase 2 enhancements.
- Quarterly releases of enhancements as needed.

History	Msg ID	Priority	Message Type	Posting Timestamp	Regions	Emergency Message	Cancellation Timestamp
	58	Action	DRILL - HLV Action	01.14.2015 10:35	EKPC CPP	Drill As of 10:35 on 01.14.2015 a Heavy Load Voltage Schedule Action has been issued. Additional Comments: This a drill. Refer to Winter drill instructions for next steps.	
	57	Warning	HLV Warning	01.14.2015 10:34	AEP DEOK ComEd	As of 11:00 on 01.14.2015 a Heavy Load Voltage Schedule Warning has been issued. Additional Comments: Refer to operating guides for more information.	
	52	Informational	Special Notice	01.14.2015 07:54	PJM	As of 07:54 on 01.14.2015 hours, on 15.Jan.2015 SOT will conduct cycle training on the EP application.	
	51	Informational	Special Notice	01.14.2015 07:45	PJM	As of 07:45 on 01.14.2015 hours, , SOT EP Training will take place on 15.Jan.2015	01.14.2015 07:52
	50	Informational	TLR	01.14.2015 07:41	PJM	As Of 08:15 on 01.14.2015 hours, a TLR Level 1 has been issued for control of flowgate 203, Axton-Danville 138 kV (1) l/o Jacksons Ferry-Antioch 500 kV	
	30	Action	Emergency Load Mgmt Reduction Action	01.13.2015 09:27	PECO	As of 09:27 on 01.13.2015 hours (Notification Time), a NERC level EEA2 and Emergency Load Management have been issued. Load reductions should be implemented by end of Notification Time plus lead time and remain in place until released by PJM. Mandatory DR reduction time periods are based on product specific requirements. CSPs should review eLRS for specific registration details. Lead time(s) dispatched: LONG_120 . Product(s) dispatched: Limited DR	
	10	Alert	Cold Weather Alert	01.12.2015 14:29	AEP DAYTON	As of 14:29 on 01.12.2015 hours, a Cold Weather Alert has been issued for the 01.12.2015 Operating Day . As indicated in M-13, members are expected to perform the following actions: <ul style="list-style-type: none"> • Generation (Gen) dispatchers review and update their unit parameters in eMkt through the Cold Weather Alert period paying particular attention to accurate Start-up and Notification, Min Run Time, Max Run Time, Eco Min/Max and Emergency Min/Max information. • Gen dispatchers with dual fuel units confirm the equipment is functional & amount of alternate fuel available. - Outages to the alternate fuel capability will be submitted to PJM via eMkt. - Alternate fuel restrictions will also be communicated via eMkt. • Gen dispatchers review fuel supply/delivery schedules in anticipation of greater than normal operation of units. • Transmission/Gen dispatchers review plans to determine if any maintenance/testing, scheduled/being performed, on any monitoring, control, transmission/generating equipment can be deferred/cancelled. 	

Records Per Page: 15 (1 of 1)

All times are in EPT

- General look of page changed to match updated PJM page style format.
- Buttons on left hand side replaced with tabs.
- By default, all active postings and postings for today + last 2 days are displayed.

A screenshot of the PJM web application's "Postings" page. The interface features a top navigation bar with four tabs: "Postings" (selected), "Message Definitions", "Message Priorities", and "Emergency Bid Form". Below the tabs is a search and filter section with the following elements: "From" date field set to "01/13/2015", "To" date field set to "01/15/2015", a "Regions" dropdown menu, a "Message Types" dropdown menu, a "PJM Drill" checkbox, an "Include" dropdown menu, an "Active Only" checkbox, and a "Reset" button. At the bottom of the filter section, a status bar displays "Last Updated: 01.15.2015 09:39:10" and "Filters: 01/13/2015 to 01/15/2015; Include PJM Drill".

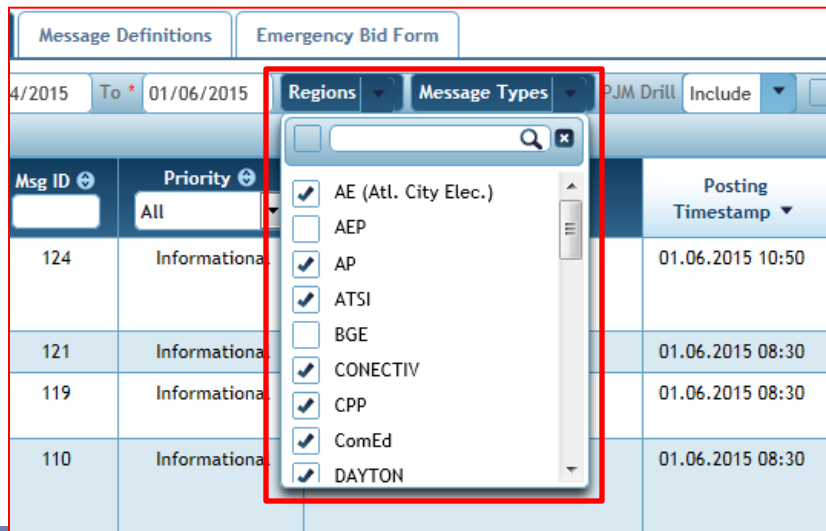

- Posting History now available to users.

- Drill postings indicated by colored banner and 'DRILL' in Message Type.

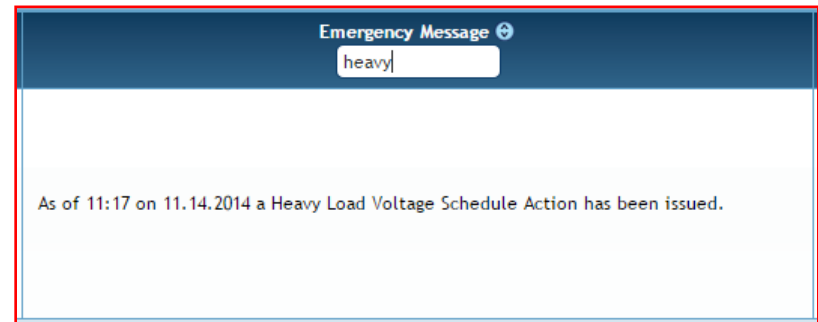

Records Per Page: 15 (1 of 1)							
History	Msg ID 	Priority 	Message Type 	Posting Timestamp 	Regions 	Emergency Message 	Cancellation Timestamp 
	58	Action	DRILL - HLV Action	01.14.2015 10:35	EKPC CPP	<div style="background-color: #FFDAB9; padding: 5px;"> Drill </div> As of 10:35 on 01.14.2015 a Heavy Load Voltage Schedule Action has been issued. Additional Comments: This a drill. Refer to Winter drill instructions for next steps.	
	57	Warning	HLV Warning	01.14.2015 10:34	AEP DEOK ComEd	As of 11:00 on 01.14.2015 a Heavy Load Voltage Schedule Warning has been issued. Additional Comments: Refer to operating guides for more information.	

- Advance filtering options:
 - Filter for desired postings by checking/unchecking applicable Regions and Message Types.
 - Filter postings by entering keyword in the text boxes below column headers.

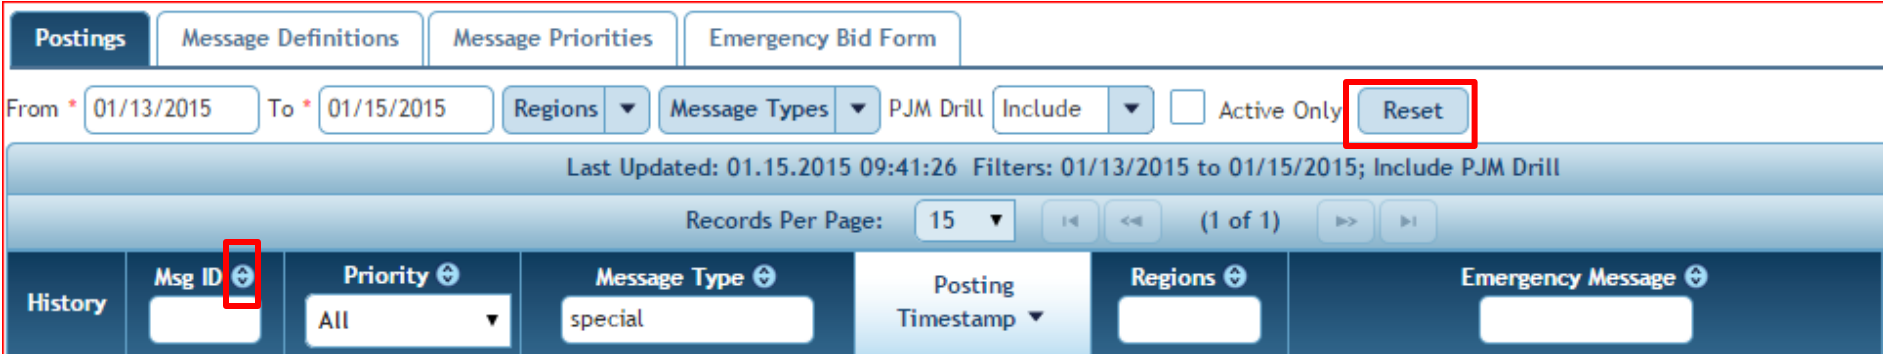

The screenshot shows the 'Emergency Bid Form' interface. At the top, there are tabs for 'Message Definitions' and 'Emergency Bid Form'. Below the tabs, there are filters for 'To' (01/06/2015), 'Regions', 'Message Types', 'PJM Drill', and 'Include'. A table of message definitions is displayed with columns for 'Msg ID', 'Priority', and 'Posting Timestamp'. A dropdown menu is open over the 'Regions' filter, showing a list of regions with checkboxes: AE (Atl. City Elec.), AEP, AP, ATSI, BGE, CONECTIV, CPP, ComEd, and DAYTON. The 'Posting Timestamp' column contains values like '01.06.2015 10:50', '01.06.2015 08:30', and '01.06.2015 08:30'.

Msg ID	Priority	Posting Timestamp
124	Informational	01.06.2015 10:50
121	Informational	01.06.2015 08:30
119	Informational	01.06.2015 08:30
110	Informational	01.06.2015 08:30

The screenshot shows an 'Emergency Message' dialog box. At the top, there is a search filter box containing the text 'heavy'. Below the search box, the message text reads: 'As of 11:17 on 11.14.2014 a Heavy Load Voltage Schedule Action has been issued.'

- Click the double arrows to sort by column:
 - Click once to sort in ascending order.
 - Click twice to sort in descending order.
 - Click Reset to reset all filters and sorting.

The screenshot shows the PJM Postings interface with the following elements:

- Navigation tabs: Postings (selected), Message Definitions, Message Priorities, Emergency Bid Form.
- Search filters: From * 01/13/2015, To * 01/15/2015, Regions (dropdown), Message Types (dropdown), PJM Drill (dropdown), Include (checkbox), Active Only (checkbox), and a **Reset** button.
- Status bar: Last Updated: 01.15.2015 09:41:26, Filters: 01/13/2015 to 01/15/2015; Include PJM Drill.
- Records Per Page: 15 (dropdown), navigation arrows, (1 of 1).
- Table headers: History, **Msg ID** (with double arrows), Priority (dropdown: All), Message Type (dropdown: special), Posting Timestamp (dropdown), Regions (dropdown), Emergency Message (dropdown).

- Click on the XML button to download a copy of the postings in XML.

Message Definition ✕

Message Type HLV Warning

Definition Is issued to members via the ALL-CALL system (Generation and Transmission) to request members to prepare for maximum support of voltages on the bulk power system.

[Close](#)

Message Definitions		
Postings	Message Definitions	Message Priorities
Emergency Bid Form		
Message Type ▲	Definition Ⓢ	Priority Ⓢ
<input type="text"/>	<input type="text"/>	All ▼
Cold Weather Alert	Is to prepare personnel and facilities for expected extreme cold weather conditions.	Alert
Curtl Bldg Load	PJM and Member facilities may be implemented at the same time.	Action
Emergency Energy Request	This is a request by PJM for emergency purchases of energy. PJM will select which offers are accepted based on price and expected duration of the need. This request is typically issued at the Max Emergency Generation emergency procedure step. The Emergency Energy Bid Form can be found on the webpage for Emergency Conditions.	Warning
Emergency Load Mgmt Reduction Action	The purpose of the Load Management Reduction Action is to provide additional load relief by using PJM controllable load management programs.	Action
Emergency Voluntary Energy Only Demand Response	The purpose is to request end-use customers registered in PJM's Emergency Voluntary Energy Only Demand Response to reduce load. These reductions are voluntary.	Action
High System Voltage	All companies shall take the following actions on the Bulk Electric System: 1. All switchable capacitors are out of service. 2. All reactors are in service. 3. Transmission Owners [TOs or TO] are requested to review and adjust LTC settings as appropriate. All LTC (230 kV and above) and voltage schedule adjustments shall be coordinated with PJM Dispatch. 4. All SVCs are absorbing reactive power. (FE Fairmont will implement the Black Oak SVC System High Voltage settings and change the voltage Vmax set point from 550kV to 540kV and the VDBmax from 545kV to 535kV.) 5. Generation Owners [GOs or GO] shall coordinate reactive power adjustments with TOs. 6. GOs shall communicate, with PJM and the TO, restrictions to their generator's ability to absorb MVARs if that capability varies from the existing D-Curve. 7. GOs will operate generators at the lower bandwidth of their voltage schedule when possible.	Action
HLV Action	Is issued to members (Generation and Transmission) at peak load periods via the ALL-CALL system to request maximum support of voltages on the bulk power system and increase reactive reserves on the 500kv system.	Action
HLV Warning	Is issued to members via the ALL-CALL system (Generation and Transmission) to request members to prepare for maximum support of voltages on the bulk power system.	Warning
Hot Weather Alert	Is to prepare personnel and facilities for extreme hot and/or humid weather conditions which may cause capacity requirements/unit unavailability to be substantially higher than forecast are expected to persist for an extended period..	Alert
Load Shed Directive	This Emergency Procedure Action is a directive around the shedding of firm load in a local area in order to address an uncontrollable overload(s) on a local transmission facility(ies).	Action
Local MinGen Event	A Local Minimum Generation Event is implemented when there is an excess generation situation in a localized area or set of areas, which has the potential to result in stability issues or constrained operations.	Informational

 [Message Definitions](#) |
 [Message Priorities](#) |
 [Emergency Bid Form](#)

Text ▲	Description ⚙
■ Action	Requires PJM and/or Member response.
■ Advisory	Typically issued days in advance of the operating day for elevated awareness.
■ Alert	Issued in advance of the operating day for elevated awareness.
■ Informational	General Notices.
■ Warning	Issued real- time, typically preceding, and with an estimated time/window for a future ACTION.

- Hyperlink is provided to open the Emergency Bid Form.

A screenshot of a web application interface. At the top, there is a dark navigation bar with "My Tools" on the left and "Welcome Guest (GUEST) | Sign In | Contact | Help" on the right. Below this is a header section with the PJM logo and the text "Emergency Procedures". A horizontal bar with a multi-colored background contains the text "Emergency Bid Form" in orange. Underneath this bar is a row of four buttons: "Postings", "Message Definitions", "Message Priorities", and "Emergency Bid Form" (which is highlighted in dark blue). The main content area has the heading "Emergency Bid Form" and a paragraph of text: "A link to the Emergency Energy Bid Form submission is provided below. Please refer to the rules and instructions contained within the form for submission of Emergency Energy bids." Below the text is a blue hyperlink labeled "Emergency Energy Bid Form".

- Browserless XML Changes
- Application Demo
- Scheduled Future Enhancements

- Similar to eData in eSuite, Emergency Procedures will have a Guest Login and a User Login.

- Users will be able to request access to Emergency Procedures (Production and Sandbox) via eSuite CAM.
 - These require separate CAM authorizations.
- With an account, users can set up profiles:
 - Set up email and email-to-text notifications for specific message types and regions.

- Multiple email addresses allowed per user.
 - Phone numbers can be set up in email format. E.g. 1234567890@messaging.sprintpcs.com.
 - User can select whether to receive full text or abbreviated text via email.
 - Emails will be sent from ep_support@pjm.com.

- Background
