Figure 1:

- RTO supply curve includes sell offers from all LDAs
- Sell offers within Constrained LDAs that cleared at a price higher than the RTO resource clearing price were assumed to be zero in graphing the RTO supply curve
- Base Capacity Constraint was binding at the RTO level
- Coupled sell offers that did not clear are represented using the sell offer with the lowest offer price
Figure 2:

2018/2019 Base Residual Auction EMAAC Supply Curve

- EMAAC supply curve includes sell offers of all product types (Capacity Performance, Base Capacity, and Base DR/EE)
- Imported MWs are represented with a zero sell offer price
Figure 3:

2018/2019 Base Residual Auction COMED Supply Curve

- COMED supply curve includes sell offers of all product types (Capacity Performance, Base Capacity, and Base DR/EE)
- Imported MWs are represented with a zero sell offer price
