Introduction: The graphs below represent a smoothed supply curve of sell offers offered into the RTO and constrained LDAs as described in the OATT Attachment DD Section 5.11(e)

Figure 1: 2023/2024 Base Residual Auction RTO Supply Curve

- RTO supply curve includes sell offers from all LDAs
- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Sell offers within Constrained LDAs that cleared at a price higher than the RTO resource clearing price were assumed to be zero in graphing the RTO supply curve
Figure 2:

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction.
- Imported MWs are represented with a zero sell offer price.
- Sell offers within Constrained Child LDAs that cleared at a price higher were assumed to be zero in graphing the MAAC supply curve.
Figure 3:

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price
Figure 4:

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price
