Introduction: The graphs below represent a smoothed supply curve of sell offers offered into the RTO and constrained LDAs as described in the OATT Attachment DD Section 5.11(e)

Figure 1: RTO Smoothed Supply

- RTO supply curve includes sell offers from all LDAs
- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Sell offers within Constrained LDAs that cleared at a price higher than the RTO resource clearing price were assumed to be zero in graphing the RTO supply curve
- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price
- Sell offers within Constrained Child LDAs that cleared at a price higher were assumed to be zero in graphing the MAAC supply curve
Figure 3: EMAAC Smoothed Supply

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price
- Sell offers within Constrained Child LDAs that cleared at a price higher were assumed to be zero in graphing the EMAAC supply curve
Figure 4: DPL-South Smoothed Supply

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price
Figure 5: BGE Smoothed Supply

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price
Figure 6: DEOK Smoothed Supply

- The VRR Curve is adjusted for Price Responsive Demand (PRD) in this auction
- Imported MWs are represented with a zero sell offer price
