Formula Rate - Non-Levelized For the 12 months ended 12/31/2022 Rate Formula Template Utilizing FERC Form 1 Data

WEST PENN POWER

General Note: References to pages in this formulary rate are indicated as: (page#, Line#, col.#)

References to data from FERC Form 1 are indicated as: #.y.x (page, Line, column)

- Annual allocation Factor is utilized to calculate the incremental income tax and return for a scaled basis points adder to the ROE and will be utilized only in the instance there exists Commission approved ROE incentive projects; else there will exist no incremental income tax and return
- Prepayments shall exclude prepayments of income taxes.
- Includes the annual income tax cost or benefits due to permanent differences or differences between the amounts of expenses or revenues recognized in one period for ratemaking purposes and the amounts recognized for income tax purposes which do not reverse in one or more other periods, including the cost of income taxes on the Allowance for Other Funds Used During Construction
- Upon enactment of changes in tax law, income tax rates (including changes in apportionment) and other actions taken by a taxing authority, deferred taxes are re-measured and adjusted in the Company's books of account, resulting in excess or deficient accumulated deferred taxes. Such excess or deficient amount was measured and recorded for financial reporting purposes.

  The balances in accounts 190 281, 282, and 283 shall be adjusted for items as slighed on Attachment 7. For example, any and all amounts in contra accounts deterified as regulatory assets or liabilities related to FASB 106 or 109 should be excluded. The balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.
- G Mentified in Form 1 as being only transmission related.
  Case Working Capitul assigned to transmission is one-eighth of O&M allocated to transmission at page 3, Line 16, column 5 minus amortization of regulatory assets (page 3, Line 15, col. 5). Prepayments are the electric related prepayments booked to Account No. 165 and reported on Page 111, Line 57 in the Form 1.
- 1 Line 9 EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1. Line 10 Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting
- temzed at 351.h.

  Includes only FICA, memployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts and taxes non-functionalized to Transmission are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.

  The currently effective income tax rate, where FIT is the Federal income tax rate, and p = "the percentage of federal income tax deductible for state income tax rate, where FIT is the Federal income tax rate, and p = "the percentage of federal income tax deductible for state income taxes." If the utility is taxed in more than one state it must attach a work paper showing the name of each state and low the blended or composite SIT was observed.

  He hended or composite SIT was observed, Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, nuther than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f.) multiplied by (1/1-T) (page 3, Line 32).

Inputs Required: FIT = 21.00%
SIT = 9.99% (State Income Tax Rate or Composite SIT) = 9.99% (State Income Tax Rate or Composite SIT) = 9.99% (State Income Tax Rate or Composite SIT) = 9.99% (State Income tax deductible for state purposes) = 1. Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nov. 561.1 - 561.3, and 561.BA, and related to generation seep-up facilities are those facilities at a generation substation on which there is no through-flow when the generation is shuf down.

Removes transmission aloud devices in the device of the death of the state purposes, generation seep-up facilities are those facilit

- M Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test).
- N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.
- Enter dollar amounts
  Debt cost rate = Attachment 10, Column (j) total. Preferred cost rate = preferred dividends (Line 30) / preferred outstanding (Line 32). ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC.
- Q Line 37 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor

- In the day income related only to transmission facilities, such as pole attachments, rental and special use.

  Exchales revenues unrelated to transmission facilities, such as pole attachments, rental and special use.

  Exchales revenues unrelated to transmission services.

  The revenues credited on page 1, Lines 24-do not include revenues associated with FERC annual charges, goos receipts taxes, ancillary services, or facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template. The revenue on Line is is supported by its own reference.
- U Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC
  Un Page 4, Line 40, enter revenues from RTO settlements that are associated with NTS and firm Point-to-Point Service for which the load is not included in the divisor to derive AP Zonal rates. Exclude non-firm Point-to-Point revenues and revenues related to RTEP projects.
- Account Nos. 561.4, 561.8, and 575.7 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. Calculate using a 13-month average balance.
  Calculate using average of beginning and end of year balance.
  Includes only CWP authorized by the Commission for inclusion in rate base.

- AA Any actual ROE incentive must be approved by the Commission; therefore, Line will remain zero until a project(s) is granted a ROE incentive adder. BB A&G adjustment to address specific assignment to distribution or transmission

- The Vector Specialists of the Vector Special Security of the Vector Vect

[A] Reference for December balances as would be reported in FERC Form 1.
[B] AGC's capital structure adjustment per FERC Docket No. ER84-504-000

Renaissance issued securitized debt in 2007 and the proceeds were distributed up to Mon Power in the form of a dividend. The balance in account 216.1 related to Renaissance does not require exclusion as [C] there is an offsetting amount in account 216 and therefore no impact on total equity.

# Stated Value Inputs

Formula Rate Protocols Section VIII.A

### 1. Rate of Return on Common Equity ("ROE")

SFC's ROE is set to: 11.35%

# 2. Postretirement Benefits Other Than Pension ("PBOP")

\*sometimes referred to as Other Post-Employment Benefits, or "OPEB"

Total FirstEnergy PBOP expenses -\$15,646,300 Labor dollars (FirstEnergy) \$2,161,999,525 cost per labor dollar -\$0.0072

### 3. Depreciation Rates (1)

- Upon a tax rate change (federal, state and/or, if applicable, state apportionments), the Company remeasures its deferred tax assets and liabilities to account for the new applicable corporate tax rate. For schedule M items not directly taken to the P&L, the result of this remeasurement is a change to the net deferred tax assets/hiabilities recorded in accounts 190, 282, and 283 with a corresponding change in regulatory assets (account 182.3) and regulatory liabilities (account 254) to reflect the return of/collection from excess/deficient deferred taxes tso/from customers. The remeasurement is effective and or Tax in result on the thin imig difference and PAB1 I deferred tax balance (the historical ADIT based on the timing difference and the rate in effect when the timing difference coccurred.) The difference in the two results is reclassified from ADIT to regulatory assets/liabilities for deficient/excess ADIT. Within the FERC Form 1, deficient and excess ADITs in Account 182.3 and Account 254, respectively are presented grossed-up for tax purposes. For ratemaking purposes, these grossed-up balances are treated as FAS109 and subsequently removed from rate base, thereby ensuring rate base neutrality for tax rate changes. The Company would follow the process described above to remeasure ADIT balances (increase or decrease) due to any future income tax rate change.

- Beginning balance of year is the end of the prior year balance as reflected on FERC Form No. 1, pages 232 (Account 182.3) and 278 (Account 254) in the event the Company populates the data enterable fields, it will support the data entered as just and reasonable in its annual update. The amortization periods shall be consistent with the following:

  ARAM, or directly assigned based on average remaining life of assets for property items not in PowerTax Protected Ron-Property, & Non-Protected Property:

  ARAM, or directly assigned based on average remaining life of assets for property items not in PowerTax Protected Non-Property, & Non-Protected Non-Property will be directly assigned and presented in the table above
  The amortization of the tax reg asset/liability will occur through FERC income statement Accounts 410.1.1 and 411.1 for property and 410.1 for non-property Ending balance of year is the end of current year balance, as reflected on FERC Form No. 1, pages 232 (Account 182.3) and 278 (Account 254)
  The amortization gross-up for taxes occurs on Attachment H-11A, page 3, line 39, Co. 3
