Re: Deactivation Notice for Battery Storage Trent Generating Unit

Dear Mr. Heuckeroth,

This letter is submitted by PJM Interconnection, L.L.C. ("PJM"), in response to the notice submitted by Chris Howson dated September 22, 2023 notifying PJM of the intent to deactivate the following generating unit located in the PJM region effective on January 1, 2024:

- Trent Battery Storage

In accordance with Section 113.2 of the PJM Open Access Transmission Tariff (PJM Tariff), PJM System Planning and the affected Transmission Owner performed a study of the PJM Transmission System and did not identify any reliability violations resulting from the proposed deactivation of the Trent Battery Storage Unit.

Because there are no reliability violations associated with the deactivation of this generator, consistent with Section 113.2 of the PJM Tariff, the generating unit may deactivate on January 1, 2024, or sooner if desired. Please confirm the date on which you will deactivate this generator.

Please be advised that PJM's deactivation analysis does not supersede any outstanding contractual obligations between the Trent Battery Storage Unit and any other parties that must be resolved before deactivating this generator.

Also please note that in accordance with the PJM Tariff Part VI, Subpart C, a Generation Owner will lose the Capacity Interconnection Rights associated with a deactivated generating unit one year from the actual Deactivation Date unless the holder of such rights submits a new Generation Interconnection Request within one year after the Deactivation Date.

In addition, if a generating unit is receiving Schedule 2 payments for Reactive Supply and Voltage Control, the generating unit owner must notify PJM in writing when the unit is

deactivated. Moreover, in accordance with the requirements of Schedule 2 of the PJM Tariff, the generation unit owner must: (1) submit a filing to the Federal Energy Regulatory Commission (“FERC”) to terminate or adjust its cost-based rate schedule to account for the deactivated or transferred unit; or (2) submit an informational filing to the FERC explaining the basis for the decision not to terminate or revise its cost-based rate schedule.

Please contact Augustine Caven (610-666-8200) ([Augustine.Caven@pjm.com](mailto:Augustine.Caven@pjm.com)) in PJM’s Transmission Coordination & Analysis Department if you have any questions about the PJM analysis.

Very truly yours,

A handwritten signature in black ink that reads "Paul McGlynn".

Paul McGlynn,  
Vice President, System Planning
